Description of product

The product „Pulley, type AP-082“ consists of two light composition rotary sheaves mounted in a block. The products can be used to link a rope to a connector to safeguard a mountaineer and reduce the friction while the rope is moving under load. The products are intended for using with a rope of maximum diameter of 14 mm and are fitted with hole being use for connection of a connector. The pulleys are permanently combined. All edges are free from burrs and rounded.

Static strength of the product: 25 kN
